

Werken op .

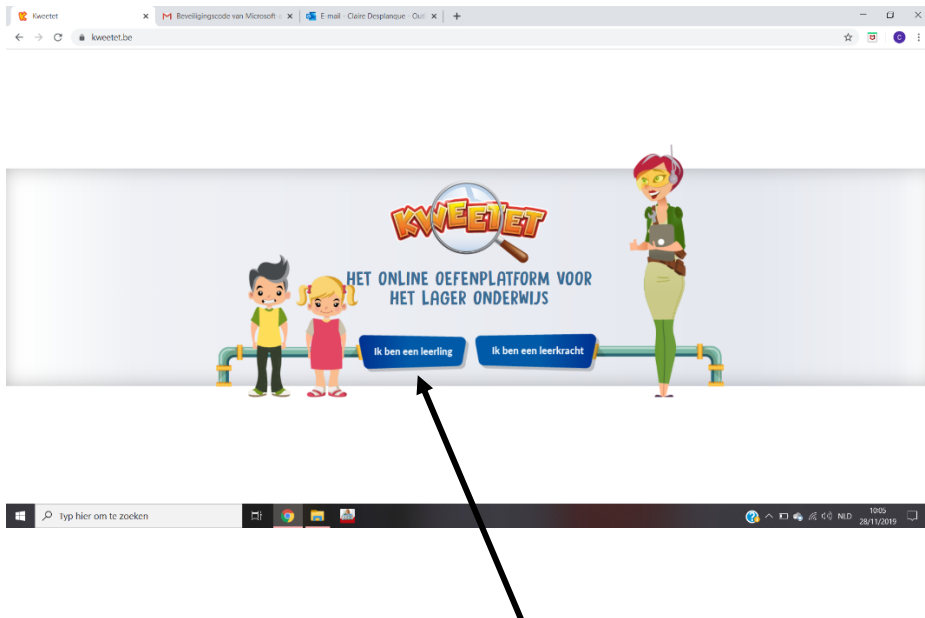

Stappenplan

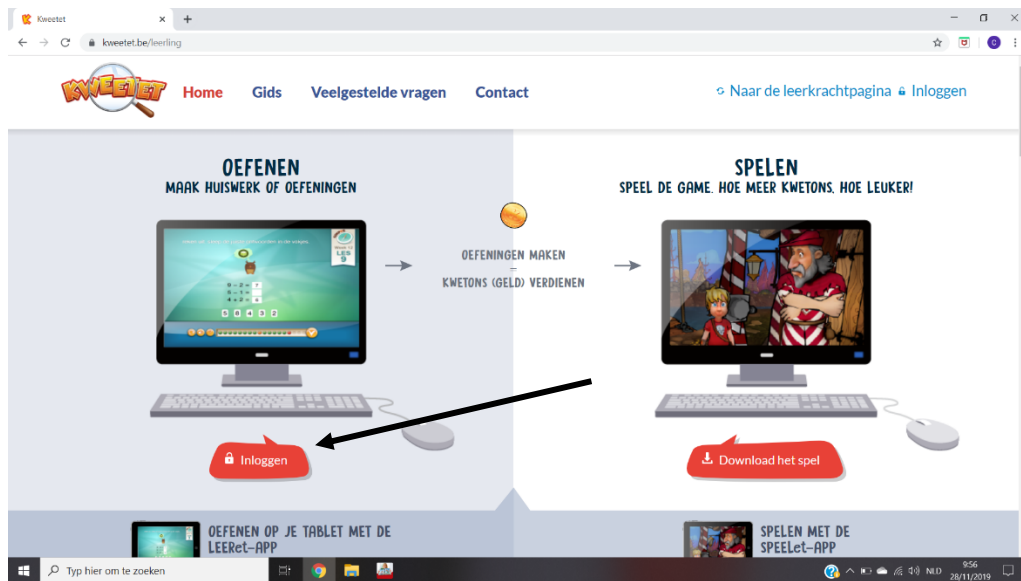

Stap 1: Ga naar de site van : www.kweetet.be

Stap 2: klik op “ik ben een leerling”

Stap 3: Klik op “inloggen”

Stap 4: vul je schoolgegevens in

Indien je op de tablet met **KweeTet** wil werken, kan je dat hier downloaden.

The screenshot shows the KweeTet website interface. At the top, there is a navigation bar with fields for 'mijn schoolcode', 'Selecteer je klasnaam', 'mijn klasnummer', 'mijn wachtwoordcode', and an 'Inloggen' button. The main content is divided into two columns:

- OEFENEN** (Left): 'MAAK HUISWERK OF OEFENINGEN'. It features a computer monitor displaying a math exercise. Below the monitor is a red 'Inloggen' button. A black arrow points from this button to a tablet icon at the bottom left.
- SPELEN** (Right): 'SPEEL DE GAME. HOE MEER KWETONS. HOE LEUKER!'. It features a computer monitor displaying a game scene. Below the monitor is a red 'Download het spel' button.

Between the two columns, a flow diagram shows 'OEFENINGEN MAKEN' leading to 'KWETONS (GELD) VERDIENEN', which then leads to 'SPELEN MET DE SPEELet-APP'. At the bottom of each column, there are links to download the respective apps: 'OEFENEN OP JE TABLET MET DE LEERet-APP' and 'SPELEN MET DE SPEELet-APP', both with 'Download' buttons.

The bottom of the screenshot shows a Windows taskbar with a search bar, task icons, and system tray information including the date '28/11/2019' and time '9:56'.
